Lecture on

"AI Governance: From Finance to Society – Building Trust, Resilience, and the Next Generation"

by Ms Cornelia Yip

Founder & CEO of Cornelia AIGov

Date: **20 January 2026 (Tuesday)**

Time: **4:00 – 5:15 pm**

Venue: **Room 215,**
2/F, Cheng Yu Tung Building,
The Chinese University of Hong Kong,
12 Chak Cheung Street,
Shatin, N.T.

Language: **English**

Abstract:

AI governance started in finance because banks had to safeguard stability, trust, and global economy. But today, AI is everywhere, healthcare, education, public services, and beyond. Governance frameworks that protect financial giants must now become the foundation for all industries and blueprint for educating our next generation, it must evolve into a universal standard that shapes how we innovate, educate, and govern. This lecture explores why finance, government, and education are the three critical pillars of responsible AI adoption. We'll uncover the real risks of GenAI and AI, including hallucinations, prompt hacks, bias, lack of transparency, and why collaboration across sectors is essential to prevent these risks from spilling into our society and impact the youth.

Details:

- Why finance pioneered AI governance and what lessons can be shared
- How governments can move beyond regulating banks to enabling cross-industry standards
- Why educators must embed AI ethics and governance into curricula to prepare future leaders
- Strategies for collaboration: shared frameworks, regulatory, and talent pipelines

About the Speaker:

From IBM to AI Governance Thought Leader. Cornelia Yip, Founder & CEO of Cornelia AIGov, is recognized as one of Hong Kong's pioneers in AI governance. Cornelia was among the first professionals to specialize in this emerging field since 2020—when AI governance just began to gain global attention. With a background in Business and Computer Science from CUHK and experience as a former IBM consultant, Cornelia has led a number of global AI governance initiatives for multinational corporations and successfully implemented AI governance frameworks across diverse industries.

Her work addresses critical challenges such as Agentic AI & GenAI Governance, AI ethics, fairness & transparency, data privacy, data quality, and corporate accountability—empowering organizations to innovate responsibly in the AI era.
